Education

Siddaganga Institute of Technology, Tumkur

B.E. in Computer Science and Engineering (AI & ML)

2023–Present

CGPA: 9.06 / 10

Sri Siddaganga PU College, Davangere

Pre-University Course (Science)

2021–2023

94.33%

Sri Mahadeva Kesari High School, Attigere

SSLC

2020–2021

94.72%

Coursework

Operating Systems, Computer Networks, OOPS, Database Management Systems (DBMS)

Technical Skills

Languages: C++, Python, SQL

Data Analysis : Pandas, NumPy, Data Preprocessing

Visualization: Tableau, Power BI

Tools: Microsoft Excel

Projects

Autonomous E-Commerce Agent using LLMs with RAG

React, Node.js, Python, MongoDB, LLMs

- Built a full-stack system to track competitor prices and maintain 180-day historical price intelligence.
- Designed a microservice architecture using a Node.js API gateway and Python Flask scraping service.
- Implemented dual web scraping using BeautifulSoup with Selenium fallback for dynamic pages.
- Integrated a Retrieval-Augmented Generation (RAG) pipeline with an Ollama LLM to generate competitive pricing strategies.

OmniSight: Attendance Management System with Face Recognition

Next.js, Python Flask, AWS Rekognition, DynamoDB, S3, EC2

- Developed a cloud-based attendance management system using facial recognition to automate attendance tracking and prevent proxy attendance.
- Integrated AWS Rekognition for real-time face detection and biometric verification, enabling accurate student identification.
- Designed and implemented secure role-based access control (RBAC) with Flask APIs, DynamoDB storage, and Bcrypt-based authentication.
- Deployed the full-stack application on AWS EC2, leveraging S3 and DynamoDB for scalable image storage and attendance record management.

Achievements

- Second Runner-up – Byte Surge Coding Contest (Browse Event), SIT.
- Solved 230+ Data Structures & Algorithms problems in C++ and SQL problems on LeetCode.
